

F Series

F Series

F series is a low cost and low frequency connector, which is supplied with a threaded coupling interface. Mostly, the plug type utilizes the center contacts of the cable rather than a separately applied pin. The impedance of F connector is controlled at 75 ohms, and this series can be used up to frequencies 2GHz. The F is suitable for the standard ranges of flexible cables, and also available as a PCB mounted version.

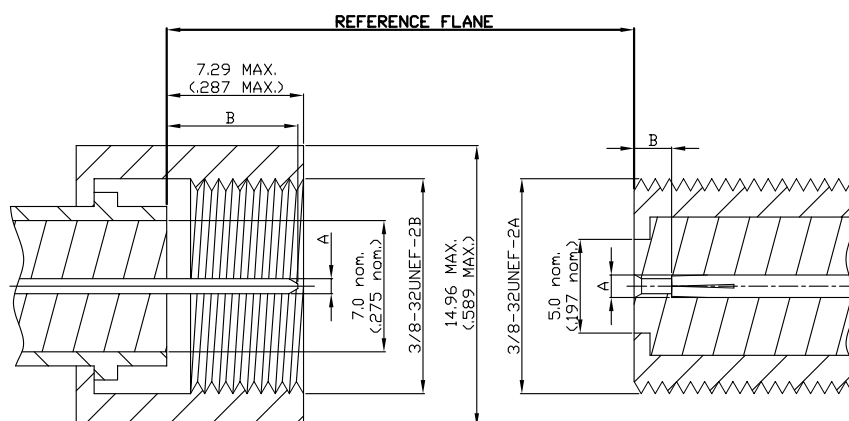

Applications:

*TV *MTV *satellite communication
